#### MANAGEMENT DISCUSSION AND ANALYSIS

#### a. Economic and Business Overview:

Despite the tumultuous global economic environment in 2016-17 and major economies showing signs of slowdown in growth, the Indian economy has emerged as the fastest growing economy as per Central Statistics Organisation (CSO) and International Monetary Fund (IMF). As per the second advance estimates of national income, released by the Central Statistics Office (CSO) on February 28, 2017, growth rate of Gross Domestic Product (GDP) at constant market prices was 7.1 per cent in 2016-17as compared to 7.9 per cent in 2015-16. According to IMF World Economic Outlook Update (January 2017), Indian economy is expected to grow at 7.2 per cent during FY 2016-17 and further accelerate to 7.7 per cent during FY 2017-18.

India is projected to grow by 7.7 per cent in fiscal 2017, remaining the fastest growing large developing economy, as it benefits from strong private consumption and gradual introduction of significant domestic reforms, a United Nations report said. The International Monetary Fund (IMF) on Tuesday called for accelerated economic reforms for India to achieve a higher growth trajectory, while retaining its GDP growth projection of 7.2% for 2017-18.

The Government of India announced demonetisation of high denomination bank notes of Rs 1000 and Rs 500, with effect on November 8, 2016, in order to eliminate black money and the growing menace of fake Indian currency notes, thereby creating opportunities for improvement in economic growth.

#### b. Industry Structure and Developments:

Technical textile sector is one of the most emerging and inventive industries of the world. It secures fifth place in the world for being one of the sectors which has high potential of growth in the textile industry. The technical textile industry is successful because of the fact that it continuously develops innovative textiles, fabrics that can be used for various purpose, and create yarns that have multi-utility and useful in almost all types of industries.

In 2015, technical textiles accounted for around 29 per cent share of the global textile revenues. Demand for technical textiles is expected to stay steady during the period 2015-2020, due to a broadening application in end-use industries, such as automotive, construction, healthcare, and sports equipment etc. In 2015, the global technical textiles market was valued at around \$153 billion. On back of strong demand, the global technical textiles market is estimated to reach at \$194 billion by 2020, with global consumption expected to surpass 40 million tonnes

In the domestic market of India, this industry is gaining popularity due its versatility, durability and cost-effectiveness. New innovations take place everyday therefore; in future the industry is expected only to strengthen. The annual growth rate of technical textiles is around 4% globally as compared to home and apparel textile which is around 1% per year. In India, technical textile is a valuable part of textile industry which is rapidly growing. According to the reports, in the eleventh Five Year Plan this sector has recorded a growth rate of 11% annually.
